

# PerfectTear Plus™

A NEKOOSA BRAND

PerfectTear Plus™ is an installer friendly paper application tape that has the very best characteristics of our PerfectTear tapes, plus an additive that makes the application tape lay flat on the silicone coated release liner of the vinyl film. No edge curling, dog ears, or lifting will occur. Our tapes tear cleanly and are perfect for general purpose sign shop applications. Our eco-friendly adhesive system does not permanently stick on itself with adhesive to adhesive contact. The tape pulls apart easily and still can be used.

Nekoosa manufactures a full line of paper tape products developed for positioning and protecting cut vinyl graphics. We are committed to our products and know your results will be fantastic with our PerfectTear Plus™ tapes.
